Lower Fertilizer Prices

The Fertilizer situation has been unusual so far this season. The first prices put out by the manufacturers were at least \$10.00 per ton higher than present prices. Within the last two weeks prices have become stabilized and it is now quite certain that the bottom has been reached and that prices will not go lower this spring.

We have contracts with several leading companies whose products are noted for high quality and excellent drilling condition. As the season is now well advanced and unsettled price conditions have delayed shipments, we would advise farmers to place their orders at once as an aid to the dealer in ordering in his fertilizer so that farmers' requirements may be properly taken care of.

We guarantee our fertilizer to be as good as the best, and better than some, and our prices as low as consistent with a living profit.

Call and see us or phone us and let us book your requirements.

She was married on March 2, 1878 to John O. Kreider, who survives her. With the love and affection of a mother, she cared for his three small children, two of whom she reared to manhood and womanhood. The third, Milo, died at the age of eight years.
